New fraternity acknowledged after problems

By Kellie Huttes
Special Assignment Writer

SIUC recognized a new fraternity Sunday night that has gone through much paperwork and faced bureaucratic problems for more than a year.

The local Sigma Theta Eta chapter of the international fraternity Sigma Nu was recognized formally after almost a year of preparation by the assistant executive director of the fraternity.

This new organization increases the number of fraternities on campus to 17.

Michael K. McKenzie acknowledged the local chapter of 20 men as a colony of the international fraternity during a ceremony in the Student Center. Sigma Nu has 220 international chapters with more than 180,000 brothers, McKenzie said.

Chapter resident Mike Osborne, a transfer student from Northern Illinois University, came to SIUC last fall and was surprised to find no Sigma Nu on campus.

So instead of joining another organization, he recruited members, formed an interest group and contacted Sigma Nu executives.

Although it took a year to gather a group of members, become involved in Greek activities and be recognized, Osborne said he is excited and has many goals to achieve with this new organization.

Osborne said the group went through a lot of red tape with the University because officials did not want another campus fraternity last year, but now they want to expand their greek system.

But Harriet Wilson Barlow, associate director of Student Development, denied that the University did not want another fraternity.

McKenzie said this fraternity is different because it is diversified than other organizations in what it promotes and the type of members it attracts.

"This fraternity challenges the system — we have something different to sell our members."

SIU officials find mistake in grad rates

By Shawna Donovan
Administration Writer

An NCAA report in the Chronicle of Higher Education says that SIUC has a 20 percent six-year graduation rate, but University officials have discovered the figures are incorrect.

The numbers were presented to the SIU Board of Trustees Thursday, when some officials questioned the accuracy of the statistics.

SIUC President John C. Guyon and other officials took a closer look at the numbers compared to other state universities in a table published in the Chronicle of Higher Education's July 7, 1993 edition.

The table of numbers indicated that the University's six-year graduation rate was 20 percent of those students enrolled during 1986-87 academic year.

The NCAA composed the study of Division I schools and collected the information to see if those freshmen enrolled in 1986-87 earned their degrees by the summer of 1992.

But SIUC student trustee Mark Kochan presented the trustees with the figure of 42 percent in six years and 20 percent in four years.

The error in the publication prompted University officials to investigate the issue further, Guyon said.

"At the trustees meeting, our number at that time was reported as 20 percent," Guyon said. "All the other schools are reporting six-year data, not four-

Council to discuss mandatory inspection plan

By Dean Weaver
City Writer

The City Council will discuss tonight whether to allow mandatory inspections to check for housing code violations in Carbondale, but a student leader is afraid it will be used to enforce R-1 zoning laws.

The Rental Housing Licensing Task Force is recommending the current voluntary certificate compliance program be replaced by mandatory inspections, task force member Jeff Doherty said.

Mike Spiwak, Undergraduate Student Government president, said he has been told the inspections will deal with housing code violations and not zoning violations, but he wants it in writing.

"We want inspectors to check for building codes, not R-1 zoning violations — this needs to be written in specifically," Spiwak said.

R-1 zoning is defined as low-density, residential areas where one family and one unrelated person can live in the same dwelling.

This means no more than two unrelated people can live in the same dwelling regardless of size, Linda Gladson, senior planner for Carbondale, said.

Spiwak said he is afraid SIUC students living in R-1 zones will be caught in violation of the R-1 zoning codes although they are breaking no housing codes.

Tom Redmond, director of development services for the city, said he does not see an increase in the number of zoning violations inspectors find as a result of the mandatory inspections.

"We do ask for occupancy when Building and Neighborhood Services inspect the homes, but we're not going to grill them," he said. "Tenants will still be given five days notice before the inspection."

Redmond said the purpose of mandatory inspections is to check for housing-code violations, but if there is an obvious zoning violation then they must deal with the situation.

Proposal would limit state officials to 8-year term

By Emily Priddy
Politics Writer

Although the creator of a proposed Illinois Constitutional amendment limiting state officials' terms says it could make government more responsive to voters, one local lawmaker calls the measure an unnecessary restriction.

State Sen. Ralph Dunn, R-Du Quoin, said he opposes State Treasurer Pat Quinn's proposed

Creator says, amendment will give more power to voters

"Eight is Enough" amendment, which would limit state elected officials to eight years in office.

Dunn said the amendment is not needed because voters already control the length of officials' terms.

"We (incumbents) are every two or four years up for approval by the voters, and they have a chance to kick (us) out if they don't like (us)

or elect (us) if they do," Dunn said. "That's why we have elections."

Tom Colgan, a spokesman for Quinn, said he disagrees.

"I think (voters') options are limited because of the seniority system," Colgan said. "People vote for the incumbent because they feel they have to win clout."

Last month Quinn started a drive to put "Eight is Enough" on the

ballot for the 1994 Illinois general election, Colgan said.

Quinn's proposal affects both branches, so it would be difficult to persuade the General Assembly to approve the entire measure, although there is legislative support for executive term limits, Colgan said.

"Most people don't expect the majority of the members of the

General Assembly to support term limits because that's going to affect them," he said.

Under the state constitution, a referendum may be used to pass amendments affecting the legislature, but laws that impact the executive branch must be passed by the General Assembly, Colgan said.

Colgan said more than 1,000

Five SIUC spikers make Valley all-academic team

By Kevin Bergquist
Sports Writer

The SIUC volleyball team had a successful 1993 season on the court, and the Salukis got the job done in the classroom, too.

SIUC placed five student-athletes on the 32-member Missouri Valley Conference Academic All-Conference volleyball team announced Monday.

Four Salukis — senior Brandi Stein, junior Deb Heyne and sophomores Beth Diehl and Heather Herdes — were named to the 13-member first team.

Sophomore Kim Golebiewski was also chosen for the team.

SIUC's four first-team picks were the most of any school in the conference. No other school had more than two first-team picks.

Heyne, who posted a 3.48 grade-point average in physiology, was one of two unanimous first-team choices. Indiana State's Tiffany Graham was the other with a 3.57

see GRADES, page 11

Swimmers make waves; foes washed away in tide

By Grant Deady
Sports Writer

A tidalwave disguised as the SIUC women's swimming/diving team struck Champaign during the weekend and destroyed several teams in its path.

The Salukis bombarded Illinois State, Missouri and Illinois in three separate dual meets and then sunk all three teams at once in the quadrangular finale of the Illinois Invitational.

By sweeping the invite, SIUC improved their season mark to 5-1 and elevated the confidence of the entire squad.

"It's definitely a big boost for us," head coach Mark Kluemper said. "This was the best performance since I've been here and it should help their confidence level throughout the season."

The Fighting Illini were the Salukis first

victim on Friday evening as SIUC drummed the Big Ten powerhouse 96-72 and swam to victory in six of the dual meets nine events.

First place finishers included SIUC's 200-medley relay team of Jennifer Baus, Melanie Davis, Ila Barlean and Kelly Krough. Also, Rachel Brinn won the 200-meter freestyle, and Melanie Davis stole the 200-individual medley and 100-meter backstroke crown.

Laura Humphrey and Lisa Holland wrapped up the victors in the Illinois matchup by winning the 100-meter butterfly and 1-meter diving events for the Salukis.

Round two brought Missouri to the blocks and SIUC was once again up for the challenge, taming the Tigers 83-65.

The Mizzou win was the biggest of the dual meet competitions since they brought

the most respected program to the event.

"Missouri was the best of the three schools and was the most gratifying win," Kluemper said. "They were real impressed because Missouri came in thinking they had a chance to do exactly what we did."

This time, the Salukis captured six of the eight individual events. Sara Schmidkofer stepped into the 400-medley relay team for Baus and delivered another SIUC win. Holland dove to another 1-meter victory and Humphrey grabbed the 500-meter freestyle blue ribbon.

Rachel Brinn switched to the 100-individual medley and came up with the gold while Jennifer Bobanik stole the 200-meter butterfly. Krough, Brinn, Barlean and Humphrey got in on the action too by winning the 200-meter free relay to help

Saluki baseball recruits good catch in Schrank

By Grant Deady
Sports Writer

With SIUC awaiting the start of basketball season, Saluki baseball coach Sam Riggelman has his sites set on stopping opposing teams base stealers when spring rolls around.

Cory Schrank, one of the top prep catchers in Illinois, will be coming to the aid of coach Riggelman next fall as the senior from Guilford High School in Rockford signed a national letter-of-intent to play baseball for SIUC.

As a junior, Schrank hit .531 and was his conferences most valuable player. The 6-2, 210 pounder was also 6-0 on the hill for Guilford while posting a 2.39 ERA.

"Cory is the guy we wanted and we thought it was crucial to bring a top catcher into our program when Tim Kratochvil enters his junior season," Riggelman said. "He has some special talent, and has a chance to be an exceptional college player."

Riggelman and his recruiting staff beat out some of the country's best programs to land Schrank.

Northern Illinois, Kansas, Illinois, Stetson and Mississippi all got snubbed for the Salukis and a chance to play at historic Abe Martin Field.

His .625 league batting average, nine extra base hits and 16 RBI's in

just 16 games should have Saluki baseball backers jumping for joy.

"He is simply way ahead of most of the catchers his age," Riggelman said.

"Everything we have heard about him has been positive, and we are getting an excellent student as well."

In addition to his outstanding baseball accomplishments, Schrank works equally as hard in the classroom.

He has been a four year honor roll student and ranks in the top quarter of this year's senior class.

Schrank also plays linebacker for the Guilford High School football team and plans on majoring in athletic training at SIUC.

Guilford's head baseball coach Mike Riley said it's been a long time since Rockford has produced a player of Schrank's stature.

"He's the best prospect to come out of the Rockford area in the eight years I have been here," he said.

"He has all the tools to compete early at the NCAA Division I level."

Stein plays last match; frosh trio sign of future

By Kevin Bergquist
Sports Writer

The SIUC volleyball team said goodbye to an old friend Saturday night, but saw that the future looks bright with the performances of some promising freshmen.

Senior Brandi Stein played her last match for the Salukis in their loss to Arkansas State in the championship game of the Saluki Quadrangular.

Fittingly, Stein took the last swing for SIUC as it concluded its first winning season (14-13) since 1989.

Stein went out with a bang, posting a double-double of 14 kills

and 17 digs.

Stein finished her last season — her second for SIUC after transferring in from Parkland College in 1992 — first on the team in digs (317).

During the week of Sept. 12, Stein was ranked No. 19 in the country in dig average (4.13 per game), and was a big reason the Salukis were ranked nationally four times in that category.

SIUC head coach Sonya Locke said she will remember Stein as a player who fought her way into the lineup and produced once she got there.

"Last year, she didn't get a lot of playing time, but she worked real

hard and stayed with it, and that was a blessing for me," Locke said. "She worked real hard this year, and she did a very nice job for us, a very nice job."

While the Salukis will lose Stein, they will take into next season the experience gained by the team's three freshmen — Becky Chappell, Jodi Revoir and Jennifer Parks.

Chappell was a part-time starter this season, and played in 23 of SIUC's 27 matches.

A mainstay along the back row for the Salukis, Chappell was seventh on the team with 116 digs.

Another freshman who saw considerable action this season

was middle blocker Jodi Revoir. Revoir, who played in all 27 matches this season for SIUC, was fourth on the team in kills (234) and had a team-high 65 block assists.

Her block assist total was No. 16 on the all-time single season list. One of the hardest hitters on the team, Revoir should see major time in the middle next season.

Revoir ended 1993 on a high note, putting down a career-high 21 kills and hitting .581 against Arkansas State.

Parks was another freshman who showed some wallop, even though she saw little court time

in 1993 because of injuries and other circumstances.

Parks showed her best in Saturday's final match of the season.

Seeing by far her most court time of the season, Parks recorded a double-double of 10 kills and 12 digs.

Locke said she will look for similar production for Parks in the future as she continues to learn.

"There are still some things she needs to learn, but she is going to be really good," Locke said.

"I am just disappointed she didn't have more time on the court. I think she is going to help us in the future."

All for one

Democrats join federation for strength

By Emily Priddy
Politics Writer

SIUC's College Democrats increased their influence statewide recently by joining other Illinois campuses to form a federation, the organization's president says.

President Jim Bunton said he thinks federating will give the group a stronger voice in state government.

"I think what this allows us to do is it gives us the resources of the state," he said.

"It helps each individual chapter become stronger within the state," he continued.

Bunton said the College Democrats of America, of which the SIUC group is an affiliate, have existed since 1935.

Interest in the organization dwindled in the 1960s when President Lyndon Johnson expelled them from the Democratic National Committee because it opposed U.S. involvement in the Vietnam War, Bunton said.

The group, now back in the national committee, was revitalized during Vice President Al Gore's 1988 presidential campaign, Bunton said.

Individual chapters may form state federations if they wish, Bunton said.

"Each state is basically free to form their own federation," he said.

Katie Priekeulis, a member of the group, said she is excited about Illinois' decision to federate.

"I'm more excited about it because it doesn't feel like we're the only College Democrats," she

said. "I feel more united. Together (with other chapters) you can make more of a difference than just single chapters within the state."

Bunton and Priekeulis said federating will open lines of communication between the SIUC chapter and other chapters in Illinois.

Better communication will strengthen the SIUC chapter, Bunton said.

"I think we realize the importance of communication," he said. "I believe it's really going to enhance statewide our impact."

Priekeulis said she expects easier access to organizational information.

"It'll be easier to get information about what other College Democrats are doing in the state and it'll be easier for the College Democrats of America to get information to us (now that we've federated)," she said.

Eric Scott, president of the SIUC College Republicans, said his organization, which celebrated its centennial in 1992, already is federated.

Scott said federating centralizes the organization.

"It makes a larger organization,"

he said.

"It gives it a little bit more legitimacy as a whole."

Scott said although Democrats will benefit from their decision to federate, he does not believe it will affect their membership.

"I think you're going to have the same amount of dedication either way," he said. "I really don't think it'll change things too much."

Student voice can be heard through votes

By Tina Davis
General Assignment Writer

Students who use non-registration in Carbondale as an excuse not to vote in city elections can transfer their registration with the help of two SIUC student organizations.

The Undergraduate Student Government and Graduate and Professional Student Council will offer table-top today and Thursday in the Hall of Fame area of the Student Center so students may register for the March 15 primary elections.

Heather Peet, deputy registrar for USG, said without voting, students have no voice in government.

"Politicians won't listen to students if they have no impact on the election," Peet said.

GPSC president Susan Hall said it is important to participate in the governance system.

"In the upcoming primary election, all state constitutional offices are open: governor, treasurer, comptroller, etc.," Hall said.

Peet said nationwide, 18- to 24-year-old students made a big difference in the last

Taking stock: investing now could pay off later

By Jeff McIntire
Business Writer

The Nov. 12 issue of The Wall Street Journal states that stocks have gained more than 422 points since last November, but the significance of the gain is meaningless to many students, finance experts say.

Curt Bacon, a graduate assistant in Finance from Ashland, Ore., said many students are not interested in learning how the stock market works because many do not have business backgrounds.

The Wall Street Journal stated that the Dow Jones Industrial Average has improved by about 13 percent during the last 12 months.

Bacon said the average originally was determined by adding the stock prices of 12 major firms in the United States and dividing the figure by the number of firms to estimate the average share price of a company stock.

The meaning of the average has changed during the years because of companies splitting stocks, Bacon said.

Splitting stocks means that companies sell shares for a fraction of the original share price, such as selling five shares for \$10 each instead of one share for \$50.

The number of major stocks now used to compute the average is 30, but the number of firms cannot be used to determine the average stock price because of splitting, Bacon said.

"These days, the Dow Jones Industrial Average is only a general indicator of whether the market is going up or down," he said.

Changes in the market reflect its best expectations about the value of companies' stocks, he said.

Two factors that determine the value of stock include the size of cash flow of a company and the risk involved.

Stock prices change with factors within the company such as payroll cutting and with external factors the company cannot control such as government regulations, Bacon said.

SIUC assistant finance professor Thomas Schwarz said company earnings and interest rates are the main factors that affect stock prices.

He said cash flow includes dividends paid by companies to shareholders, and the resale value of the stock.

A dividend is an amount of money a company gives to each shareholder, which is set by company management, he said.

For example, The Wall Street Journal stated that Wal-Mart shares closed Nov. 11 at \$29 a share, and pay a quarterly dividend of 13 cents a share.

Carl Payne, a broker for A.G. Edwards & Sons, Inc., 206 W. College, said not all companies offer dividends.

Among the companies that pay dividends, the price of the stock usually goes up as the dividend increases, Payne said.

Investors still can make money off a non-dividend stock if the resale value is higher than the price at the time of purchase.

Payne said people must enter the stock market through a broker licensed by the National Association of Securities Dealers.

Potential investors can find licensed brokers in brokerage firms, insurance companies, banks and other financial institutions, Payne said.

Bacon said investing in stocks has better earnings potential than investing in a bank, but lacks the insurance and predictability of a savings account.

Nancy Sorgen, vice president of D. R. Hancock & Company, Inc., 2250 N. Illinois Ave., said most

Market alternatives offer varied risk factors

By Jeff McIntire
Business Writer

Though stocks may be the most well-known method of investing, there are several other markets people can invest in, officials say.

Bonds, commodities and put-and-call options are alternative investments available to customers, SIUC finance professor Thomas Schwarz said.

Schwarz said bonds are contracts with which investors loan cash to organizations for a certain interest rate.

Types of bonds include corporate bonds, municipal bonds and government bonds, Schwarz said.

Corporate bonds sold by companies generally are long-term investments, while municipal bonds are sold by city and state governments and government bonds by the federal government.

Schwarz said some bonds relatively are safe but some are very risky.

"Bonds are just like people — different bonds have different risks," he said.

Carl Payne, a broker for A. G. Edwards & Sons, Inc., 206 W. College, said bond prices vary inversely with the interest rate.

"A bond is an investment that will be interest-rate sensitive," he said.

Schwarz said commodities are contracts that allow purchasers to buy an underlying asset, such as a certain crop or a precious metal, at a fixed rate.

Schwarz said commodities, or futures, can be used to reduce risk or they can increase the risk.

Investors who buy futures are taking a risk, speculating that the value of the asset will increase, allowing them to resell at a higher rate.

people start investing in their 30s, and begin with mutual funds.

Sorgen said mutual funds are the best way for investors to begin, because they do not require large amounts up front and are tailored to individual needs.

Schwarz said mutual funds are organizations that choose various types of investments for the investor, freeing the customers from having to

choose their own investments.

Sorgen said another advantage of mutual funds is that they provide diversity in investments for each investor.

Not all brokers are reputable and some can steal from customers, Schwarz said.

He said people entering the investment market can check on a brokerage firm with the National Association of Securities Dealers,

An example of using futures to reduce risk is a farmer who sells a crop future at a fixed rate, fearful that the value of the crop will decline, Schwarz said.

He said options are securities which give the owner the right to purchase or sell a stock at a fixed price.

The two types of options are call options and put options. Call options on stocks give the ability to buy stock at a fixed price, and put options give the ability to sell stock at a given price.

For example, if buyers buy a call option on a stock at \$30 and the price of the stock goes up to \$35, they can still buy the stocks at the price of \$30.

If the price of the stock goes down to \$20, however, all the buyers have lost is the price of the option, rather than the difference in stock prices.

Call options are set at fixed increments, with the lowest increment above stock price being the most expensive, Schwarz said.

The advantage of options is the reduced cost of investing, but options have expiration dates and cost extra money that is not used to invest in stocks, he said.

While bonds usually have lower risks, they do not generate as high of a potential return.

Commodities generate high returns but are very risky, Schwarz said.

Nancy Sorgen, vice president of D. R. Hancock & Company, Inc., 2250 N. Illinois Ave., said commodities usually are the most risky investments, followed by options.

Sorgen said bonds are the least risky investments.

Sorgen said the more conservative brokerage firms mostly will deal with stocks and bonds, while the more aggressive firms will deal a little more with commodities and options.

but most people learn about firms by word-of-mouth.

The large national firms usually can be trusted, but not always, Schwarz said.

He said the safest way for a beginner to invest is to have many different share holdings.

Kate Leffler, a senior in finance from Newton who invests much money as a class project, agreed.

\$2.6 million windfall should go to students

THE RECENT ANNOUNCEMENT REVEALING SIU's underestimation of student enrollment, and the \$2.6 million that is considered a "windfall" for the University, has many people believing Christmas will come early this year. The truth is, the University's projected figures for fall enrollment were much lower than the actual numbers, as a result more tuition dollars were collected and perhaps for the first time in history — SIU came in under budget.

It would seem because the students' money led to this good fortune, they would be the ones who would reap the rewards. Unfortunately this may not be the case, given that University administrators have essentially instructed department heads to respond to the question: If you had more money in your budget what would you buy?

While students should be grateful the University did not overestimate the number of students who would enroll, for then they would find themselves paying more to attend SIU in the spring. The real issue here revolves around the question of why the University does not take the initiative and use the extra funding to create a service to benefit the students. Rather than doling out the responsibility to the department heads to decide what students need in the way of educational services, they should determine what would help the entire student body.

ON THE CHANCE THE ADMINISTRATION HAS run out of ideas, it seems appropriate to offer some suggestions. In an age of technological advances it is logical to assume institutions of higher education would strive to remain on the cutting edge. The main obstacles in the way of this sort of advancement are the financial difficulties along the way. This situation is clearly demonstrated on the SIUC campus: Approximately 22,000 students and about six semi-operational computer labs.

By being alerted of this additional funding, SIU has a golden opportunity to bring its facilities up to the standards of the computer age. By creating several new computer labs available for student use the University will not only be doing something to aid the students, but it will also demonstrate a responsible use of funds generated through an overabundance of tuition dollars. It is hard to imagine a bureaucratic institution acting in a mature manner and using revenue in a way that will be in the best interest of those it serves, but it can happen.

THE NEED FOR MORE COMPUTERS ON THIS campus is undisputed one; just ask any student who has waited in line until after midnight in the Faner Hall computer lab. Students unfortunate enough to have to rely on the University to provide computer facilities to type the endless ensue of papers and reports, deserve better than what SIU has to offer.

It is ludicrous to allow the chance to provide students with a better learning environment to pass through this University untouched. The argument for better undergraduate equipment in certain departments should not be ignored, but why not create something that will serve the entire student population before doting on individual departments? It is possible to allow department heads to put in requests for much needed equipment and still install five new computer labs. The average computer facility, with 20 computers and printer, can be installed for about \$38,600.

In all reality Christmas will come late for SIU, given that the money is tied up in the Legislature until after the first of the year. Meanwhile University officials and department heads can continue to compile their wish lists, and Joe Student will strive to find enough money to return for the spring semester. With finals week approaching, it is certain a familiar sight with return to SIU the endless computer line.

DUCK! CUBAN NAFTA AGENTS!

Letters to the Editor

Homeless choose to be so; Compassion not a solution

I would like to comment on Dan Page's column on November 12th about the homeless.

I've never heard a more typical liberal approach on the subject.

His entire article was one big guilt trip aimed at those of us who strive to be all we can be.

His comments about "cold hearted executives" suggest that those who achieve benefit at the expense of those who don't. This is a bunch of crap, and you shouldn't buy it.

According to the CATO Institute, 90% of the homeless are so by choice. They're drug addicts and alcoholics, and they often commit crimes to support their habits.

Nobody stuck a gun to their heads and made them do drugs or alcohol. They made a choice.

I'm sick of hearing Liberals lionize these and other victims of society.

Unlike the "cold hearted executives" who work hard, save their money, raise their kids properly, and pay taxes; these

people contribute nothing to society.

The liberal solution to homelessness is typical symbolism over substance. In our inner cities, liberals buy the homeless shopping carts, give them cash, and teach them to dine properly out of dumpsters.

Liberals call this compassion. I call it bull.

If one wants to help the homeless, they should teach them to take care of themselves. Shopping carts, cash, dumpster dining tips, the Communist Manifesto and Civil Disobedience do nothing but foster dependency and only encourage them to stay their miserable existence.

My father once told me, "If you give a man food, you've fed him for a day, but if you teach him to feed himself, you've fed him for life."

That, my friends, is compassion the conservative way: hard work, rugged individualism, traditional values, and personal responsibility.

—Michael D. Caldwell, senior, geography

Klan article questioned

When I first read the article on how the Klan leaders are working to "push a better image," I knew it had to be a joke and surely the school that I will one day call my alma mater will have more respect for me as an African American student.

I am not naive enough to believe there is no longer racism in our society. However, I would have never expected that my own school newspaper would condone such an overly bigoted set of ideals.

There is definitely something wrong when an article of such poor taste can get front page coverage.

Instead of putting on "rose colored" glasses and pretending as if such a perverse hate group could be anything but negative, perhaps the naive write should see these murderers for who they really are.

It doesn't matter if it is the KKK or Skinheads, whether you dress up in a 3 piece suit or leave it bald and tacky. Hate is hate.

—Arletta Diggs, senior, psychology

Traditional Christianity mirrors cults

Cult behavior is defined by the Cult Awareness Network as "the use of... mind control." They define mind control as the "use of... behavior modification techniques without informed consent."

In other words, initiating the individual during a naive, vulnerable or innocent state is a crime. The crime lies in the organization taking advantage if the individual's choice.

However, the techniques of mind control used by these cults are not exclusive to other, more mainstream churches.

Every Christian church I know of forces its members children to

attend, usually against their wishes. Five or ten year old children cannot possibly give informed consent when it comes to what spirituality they wish to belong to. By this definition, every Christian church is a cult.

Also two of the mind control techniques Can mentions are "meditation, chanting, and repetitive activities which... induce a high state of suggestibility, " and "fear and guilt induced by eliciting confessions...to create emotional vulnerability by...punishment and reward."

While the Chicago Church of Christ may be more extreme with

these methods, they are basically the same methods the Christian church utilizes.

The Catholic church requires confessions, and what church service doesn't include repetitious activities through prayer and singing.

My point is that the Catholic church set a precedent centuries ago using mind control to gain initiates, and the techniques are still in use today by the branch churches.

These cults are the inevitable result of a pantheon based on fear, guilt and forced attendance.

—Rollin Perkins, Graduate, American literature

ANIMAL RIGHTS, If interested in animal rights and cruelty free living please join us at 8 tonight in the Interfaith Center in Carbondale. For more information, contact Andrea at 529-9351.

CATHOLIC CHARISMATIC PRAYER Meeting will be held at 7:30 tonight at St. Francis Xavier Church. For more information, contact Terry at 985-2377.

COLA Career Horizons workshop, Environmental Careers, will be presented at 5 p.m. today in Lawson 201.

GAYS, LESBIANS, BISEXUALS, and Friends will meet at 5:30 p.m. Wednesday in Activity Rooms C and D in the Student Center. Items on the agenda will include 1994 Officer Nominations. All nominations must be received by 9 p.m. Wednesday in the GLB? ce. For more information on GLB? activity? e call the GLB? PRIDE LINE at 453-51

GRASSROOTS will be having an annual reading of poetry and fiction at 7 p.m. tonight in the Student Center. Anyone interested in reading at this event, please call Gene at 549-2296.

OUTDOOR ADVENTURE CLUB will meet at 7 tonight in the ARC in the Student Recreation Center. For more information, contact Patrick at 549-5526.

PI SIGMA ALPHA, the National Political Science Honor Society annual initiation reception will take place from 4:30 p.m. to 6:30 p.m. today in the Student Center Auditorium. For more information, contact Marc at 536-2371.

SALUKI ADVERTISING will be having a regular meeting at 7 tonight in the Communications Building Room 1214. New members are welcome. For more information, contact Ted at 529-1672.

SOCIETY FOR ADVANCEMENT OF Management will meet at 6 tonight in Quigley Room 108 B. Guest speaker will be Richard Sweet, Regional Marketing Manager from Southwest Airlines. All majors are welcome. For more information, contact Terri at 985-2577.

UNIVERSITY HONORS PROGRAM is sponsoring a free public lecture by Greenpeace researcher Joshua Handler at 8 tonight in the Student Center Auditorium. An informal reception will follow in the Old Main Lounge.

WOMEN'S NIGHT TRANSIT and Safety Van Service will not operate from Friday November 19th to Sunday November 28th, due to the University break. Night transit will resume service Monday, November 29th at 6 p.m.

ZOOLOGY CLUB and the Wildlife Society will hold a joint meeting at 7 tonight in Lawson 101. Speakers will give presentations focusing on career development and job opportunities. For more information, contact Terry at 6-2910 or Mike at 529-1672.

CALENDAR POLICY - The deadline for Calendar Items is noon two days before publication. The item should be typewritten and must include time, date, place and sponsor of the event and the name of the person submitting the item. Items should be delivered or mailed to the Daily Egyptian Newsroom, Communications Building, Room 1247. An item will be published once.

CITY, from page 1

with zoning or building-code violations, but instead we work with the tenants and the property owners to correct the problem," he said.

The mandatory housing inspection recommendation would differ from the current voluntary program by requiring all rental dwellings to be inspected at least once every three years. Tenants could no longer refuse to let an inspector into a dwelling without receiving a citation.

The proposed ordinance would increase the fines with the minimum being \$100 and the maximum \$2,500 verses the current \$50 to \$500 fines.

Doherty said the purpose of the inspections is to insure tenants' dwellings meet minimum housing code requirements.

"This assures that we can have access to the property," he said. "It will insure the properties are safe."

Task force member Lorenzo Henderson said privacy rights were a key concern in the inspections.

"We were assured that at least one person living in the dwelling would be notified 120 hours ahead of the inspection," Henderson said.

Henderson said students need to realize they can no longer refuse to have their property inspected.

"If they repeatedly don't allow inspection then they can be fined \$100 to \$2,500," he said.

The council will meet at 7 p.m. tonight in the City Council Chambers, 607 E. College Street.

NUMBERS, from page 1

year data.

"By our error, we did it," he said. "Our number should be 43 percent for that six-year period; the charts given to the NCAA reported only four-year data."

Guyon said the mistake was compounded by other errors.

"All those 'not available numbers' were changed to zero by accident and sent in," he said. "I don't know what to say but that they are six-year numbers and our number is 43.2 percent."

Scott Jaschik, associate managing editor of the Chronicle, said the information was obtained from the 1993 NCAA Division I graduation rates report and the numbers are not recent.

NCAA Communications Director James A. Machinoy said the association should be notified of the error.

"Whatever the number is, it needs to be reported to the NCAA research staff," Machinoy said.

"There is another study coming out by taking the figures later, but it does not help SIUC right now."

Guyon said the NCAA required the data to be sent in last year, and the figures reflect the demographics of the University community.

"We have a high population of non-traditional students and other students who do not graduate in four years," Guyon said. "Some students come here only to get their associate degrees in two years at the College of Technical Careers. The statistics are not terribly useful."

Guyon said the correct numbers will be given to SIUC Chancellor James Brown, who will transmit them to the trustees and eventually to the NCAA.

Kochan said he is concerned about the low numbers.

Kochan said the University of Illinois' four-year graduation rate is 51.2 percent and also was identified incorrectly as 78 percent Thursday.

TERM, from page 1

people have volunteered to circulate petitions since the drive began Oct. 14.

Colgan said Quinn has been successful in previous petition drives for measures such as the 1980 Cutback Amendment to reduce the size of the Illinois House of Representatives and said he expects a positive response to his latest effort.

"Often ordinary people can do extraordinary things," Colgan said.

The amendment's intent is to force lawmakers to focus on their constituents' interests rather than their own political careers, Colgan said.

"Pat Quinn feels that we have a system in Springfield where the politicians are rewarded for taking care of lobbyists and the special-interest groups rather than the taxpayers of Illinois," Colgan said. "With term limits in place, our legislators will be more productive, more innovative and will be bolder in taking action because they're not in there to make it a career."

Colgan said the amendment is

not designed to attack specific politicians.

"We're not finding fault with the individuals in the (political) system, we're finding fault with the system — the way it's structured," he said.

Dunn said lobbyists usually do not influence lawmakers' decisions because the politicians they support are the ones who already favor their causes.

"Lobbyists represent different entities," he said. "I'm a Republican and generally supported by business instead of being supported by labor. The people that put money into my campaign know pretty much how I'm going to vote."

Although Dunn acknowledged that incumbents have an advantage in most campaigns, he said low voter turnout at primary elections partly is to blame for limited choices in the general election.

"There are people who a lot of the time don't vote in the primary, and that's where our candidates are chosen," he said.

FRATERNITY, from page 1

McKenzie said. "We are known as the 'honor fraternity' and that attracts students."

John Riddle, a senior in radio and television from Peoria, said he heard about the fraternity from some friends and got together with Osborne last summer and helped him deal with problems in forming the new fraternity.

"There were a lot of channels we had to go through, a lot of people we had to talk with to find out how to form a chapter," Riddle said.

Riddle said the group had to go to the Inter-Fraternity Council to be passed and named Sigma Theta Eta and the Inter-Greek Council had to pass them as a fraternity.

Once passed by both councils, the group became involved in sporting and blood drive activities, tailgate skits and the council's Safe Halloween Program.

Larry Busch, faculty adviser of Sigma Nu, said it is a privilege to be a part of the newly formed fraternity.

He became involved last year and has provided encouragement and ideas, Osborne said.

McKenzie said the fraternity first was formed in 1868 at the Virginia Military Institute by three students who were subject to hazing. They formed the fraternity and took a strong stance against hazing that the organization still holds today, he said.

The fraternity was formed on the principles of honor, unity, communication and assistance and was named "The Legion of Honor," McKenzie said.

McKenzie said the fraternity focuses on risk reduction in the social environment, for example,

group members cannot use organizational funds to purchase alcohol. This promotes a responsible stance, he said.

The "leadership stance" also is very strong, McKenzie said. Sigma Nu has a Leadership Ethics Achievement and Development Program that promotes leadership skills.

Mack Shwabb, risk avoidance chairman of the council, said Sigma Nu is doing a great job at forming a chapter and becoming part of SIUC's greek system.

Bill Rongey, social chairman for Delta Chi, said his fraternity has supported the Sigma Nu's and are glad they have colonized at SIUC.

"I think it's great to have another fraternity down here, it's a way to help our greek system grow here at SIUC," Rongey said. "Of course it would be nice to have a few more sororities come down too."

Jennifer Herzog, recording secretary of Delta Zeta, said the more fraternities and sororities involved at SIUC, the better.

"A lot of people think badly of us, but they don't realize all of the community service we do throughout Carbondale," Herzog said. "We do so much and with the expansion of the greek system we can do more."

Derrick Hirohato, a Sigma Nu member from California State University in Fresno, Calif., said the same.

"Outsiders that sit outside the greek system call greek members 'rich boys,'" Hirohato said. "They don't realize our dedication to scholarships, philanthropy and humanity."

Restricting use of Shawnee would help songbirds

By John Rezanka
Environmental Writer

Tiny neo-tropical songbirds migrate thousands of miles from Southern Illinois to winter homes in Central and South America each fall.

Colorful birds such as the scarlet tanager, the hooded-warbler and the cerulean warbler leave nesting areas in the Shawnee National Forest for warmer climates.

The birds sometimes return to areas disturbed by logging and other activities, and often lose their young to parasites and predators.

Jan Wilder-Thomas, president of the Shawnee Defense Fund, said the Shawnee should be set aside as a research forest, so neo-tropical songbirds have a protected place to nest and reproduce.

Eventually, the forest could be declared a national monument for songbirds. If this happens, the emphasis on the Shawnee would shift from resource and recreation management to preservation, Wilder-Thomas said.

More than 200 species of songbirds use the Shawnee and other eastern forests as breeding areas, she said.

The songbirds need large tracts of forest to breed successfully and timber harvests are planned for some of the last large chunks of full-canopied forest in the Shawnee, she said.

Building logging roads, creating wildlife openings and cutting trees fragments the forest and helps brown-headed cowbirds parasitize songbird nests. These same activities give predators such as raccoons and opossum access to songbird nests inside the forest, Wilder-Thomas said.

Every time an opening is created in the forest, the songbirds suffer, she said.

"There is no place in the forest more than four miles from some kind of opening," Wilder-Thomas said.

The forest loses money every year on timber sales, so making the Shawnee into a research forest would be a wise use of resources,

she said.

Wilder-Thomas said she is looking to the Illinois congressional delegation to support the idea.

The first step would be getting an order from Secretary of Agriculture Mike Espy proclaiming the Shawnee a songbird research forest. The final step would be getting an executive order from President Bill Clinton making the area a national monument, she said.

"The Forest Service would still be in charge, but its priorities would change," she said. "They would have to stop making new gaps in the canopy and start closing gaps in the forest."

Steve Widowski, a wildlife biologist for the Shawnee National Forest, said significant portions of the Shawnee already are set aside for songbird research, and the fragmented nature of the forest makes it a less than ideal research setting.

It is impossible to control what happens on privately owned lands surrounding the forest, Widowski

said. Many of the cowbirds and predators come from these lands.

The forest service recognizes the value of larger chunks of forest, and some efforts have been made to consolidate the forest, he said.

Scott Robinson, an ornithologist for the Illinois Natural History Survey who studies songbirds in the Shawnee, said consolidating large chunks of forest would help songbird populations recover and result in more natural ecosystems.

"I support the general idea of changing direction from managing small areas to managing large tracts. But I don't know whether the whole forest should be set aside," Robinson said.

Robinson said the state and the forest service should work with landowners to consolidate the Shawnee, because much of the fragmentation results from private development.

If private owners are given incentives to conserve natural areas, they might decide to set aside land for wildlife instead of farming or developing it, he said.

But Robinson said the fragmented nature of the forest makes it ideal for studying songbirds.

It is an ideal place to do research in some of the worst conditions found, Robinson said. Because of the poor conditions, researchers have a good chance to see and measure improvement.

Also, the forest has been studied for years, so there is excellent data for comparative studies, he said.

Robinson has found that cowbird parasitism levels range from 30 to 90 percent in the Shawnee, and 50 to 90 percent of the songbirds in parasitized nests do not survive.

The birds lay eggs in songbird nests, and songbirds rear the young cowbirds, often at the expense of their own young, he said. Cowbirds hatch earlier than songbirds, grow faster and compete with the smaller birds for food, he added.

"It is impossible to avoid cowbirds in the Shawnee, but maintaining and improving macrosites (would be the) best long term strategy for preserving Illinois songbirds," Robinson said.

Economic conditions in Russia increase risk of nuclear disaster

By Sean L. N. Hao
International Writer

Deteriorating economic conditions in Russia increase the risk of future environmental disasters, a visiting Greenpeace researcher says.

Joshua M. Handler, who will speak about the findings of his work at 8 p.m. today as part of the University Honors Lecture Series 1993-1994 season, said Russia has a history of radiation contaminating disasters.

"It's impressive how many big accidents there have been over the years," he said. "This number hasn't diminished over that period (1950s through the 1980s) showing that they have had terrible accidents even under optimal conditions."

"The only thing that may prevent this is that economic conditions have also caused them to use their submarines less."

Handler said this decrease probably will result in carelessness at waste facilities and other locations where nuclear material is handled.

Handler, a former research associate for the Institute for Policy Studies in Washington, D.C., has spent the last few months in Russia examining the environmental effects of the country's nuclear waste storage and disposal practices under Greenpeace's Nuclear Free Seas Campaign.

While in Russia, Handler worked to document the Russian Navy's dumping of radioactive waste into the ocean in violation of Russian and International law.

In the wake of international concerns, Handler said the London Convention of international countries voted Friday to enact a permanent ban against dumping such nuclear waste at sea.

While in Russia, Handler also researched Russia's use of peaceful nuclear explosions during the last three decades.

"These were used mainly in seismic experiments and excavation," he said. "In most cases these experiments were done in secret without informing the local

population, causing extensive contamination."

Handler said Greenpeace is involved in environmental anti-disarmament issues internationally with more than 4.5 million supporters.

The free lecture on nuclear pollution in Russia will be in the Student Center Auditorium.

'Gays in military' discussion topic for captain's personal experience

By Stephanie Moletti
Entertainment Writer

A lecture program tonight will address U. S. military procedures that bar qualified men and women from service in the armed forces because they are homosexuals.

Racial minorities, women and, more recently, homosexuals have fought against the fears of white heterosexual males in the military, Bill Fargo, lecture agent for Jodi Solomon Speakers, said.

These topics will be discussed during the lecture given by Capt. Gregory L. Greeley of the United States Air Force, entitled "Gays in the Military: A Personal Perspective Lecture."

On June 23, 1991, the day before his discharge, Greeley carried a banner in a Gay and Lesbian Pride Parade in Washington, D.C. This event brought on a prolonged interrogation by special investigators about Greeley's sexual orientation.

"He was interrogated for four hours," Fargo said. "You'd think he was a criminal."

Greeley's release was prolonged, and he was kept under an administrative hold to determine whether he was a security risk until officials granted him an honorable discharge June 25 after pressure

Greeley

from the media, Fargo said.

Greeley served as a Pentagon computer-system analyst and now is a captain in the Air Force Reserves.

He also lectures about three times a month on the college lecture circuit and speaks from first-hand experience on gays in the military, Fargo said.

Greeley served in the ROTC while attending Massachusetts Institute of Technology until he graduated with a master's degree in electrical engineering. After college, Greeley served active duty in the Air Force from '87 to '91.

Tara Hielema, chairperson of

expressive arts for the Student Programming Council, said Greeley will not only speak about gays in the military, but gays and society as a whole.

"We think the issue itself will draw a lot of attention," Hielema said.

"We just hope people come to make an informed decision based on truth instead of myth. This is an excellent opportunity to get the truth and a different perspective on the issue."

The lecture will be at 8 p.m. in Student Center Ballrooms C and D.

A question and answer session in the Gallery Lounge immediately will follow the lecture for people who attended the lecture only, Hielema said.

Questions from both sides of the issue are welcome, she said.

The council will have a solicitation table from 10 a.m. to 3 p.m. today in the Hall of Fame area to answer questions about the lecture.

Lecture tickets are \$3 for students and \$4 for the general public.

Tickets may be purchased at the door or in advance at the Student Center Central Ticket Office and the Gays, Lesbians, Bisexuals and Friends office on the third floor of the Student Center.

VOTE, from page 3

presidential election.

"Last year, we registered 3,000 students to vote on campus," Peet said. "And at the USG rally last week, we registered plenty of students."

Hall said deputies registered 44 students in two hours during a rally in opposition of the bar-entry age increase last week.

"If you're going to be living down here for the next four to five years, you might as well be active," he said.

Carbondale City Clerk Janet Vaughnt said history has shown that one vote can make difference.

Vaught said it is nice to hear students' opinions on political issues.

Students should vote on issues such as school funding and student

loans," she said.

She also said it is students' responsibility to pay attention to find out about policies being voted on.

Hall said she also will register students who already are registered in their hometowns.

"Since you cannot be registered two places at one time, we will transfer your registration from your hometown to Carbondale," Hall said.

Students will be able to register from 10 a.m. to 2 p.m. Students must bring two forms of identification; one must show a picture, the other a current local address. Students also must have lived in Carbondale for 30 days prior to the election.

Kosar makes Bengals think twice

Los Angeles Times

DIMINISHING RETURNS

So far, so bad.

If Cleveland Browns fans called for his firing—and worse—a few days ago, what will happen to Cleveland Coach Bill Belichick now that Bernie Kosar is 1-0 and the Browns 0-1 since the bitter breakup?

Belichick released Kosar last week, saying the nine-year veteran's skills were "diminishing," and turned the starting job over to Todd Philcox, who had one career NFL start under his belt.

With only four days of practice after his release by the Browns and acquisition by the Dallas Cowboys, Kosar completed 13 of 21 passes for 199 yards to lead Dallas to a 20-15 victory over the Phoenix Cardinals.

Included in Kosar's day was an 86-yard completion to Emmitt Smith, the fifth-longest in Cowboy history. "I think Bernie Kosar is one heckuva player," Phoenix Coach Joe Bugel said. "He's a tremendous quarterback with a great supporting cast."

Meanwhile, Philcox, threw two interceptions and lost two fumbles in the first half as the mistake-prone Browns failed to score a touchdown in a 22-5 loss to Seattle.

WEEKLY DAVID SHULA UPDATE

His father just broke the record

for most career victories. Here's the next question: Will Cincinnati Bengals Coach David Shula break the record for most career losses?

Shula's Bengals lost again Sunday, and are 0-9 for the first time in the franchise's 26-year history.

Add that to the 11 games he lost last year, and David Shula has 20 career losses in 25 games, a nice jump on Tom Landry's record for career losses: 178.

At the pace he's at, David Shula would take a little more than 12 years to break the record. By the way, in 31 seasons, Don Shula has 153 losses (ranking him second all-time) to go with his 325 victories.

"Well, I know that we're the worst team in Bengal history, and we certainly deserve it at this time," David Shula said. "This was the worst performance that we've had. They let themselves down, everybody down."

Some Bengal players, though, weren't taking to his comments kindly.

Shula benched Harold Green, the club's leading rusher last season, after the running back missed an audible and caused a fumble in the first quarter. Green was angry about the benching and criticized Shula.

"I guess Dave was quoted after the game about this being the worst team in Bengals history," Green said.

"That may be touching closer to home to him being the worst coach in Bengals history. What goes around comes around."

PASSING FANCY

Memo to the Washington Redskins: Dave Meggett can pass the ball.

It's a little late, though, since Meggett threw a touchdown on a halfback-option against the Redskins Sunday for the second time this season—both in easy Giant victories.

"I've been in the league five years doing the same thing and it sort of gets boring," said Meggett, who came into the game with a 158.3 rating based on his one passing attempt this season.

"Dan Reeves gives me opportunities to make plays, fun type of plays like that. We don't get a chance to do that every day."

On the play Sunday, which put New York ahead, 7-0, Meggett lined up in the slot to the left, went in motion and took a handoff from the Washington 21. Then, he pulled up and threw the ball just as Chris Calloway was breaking out a cut. Calloway caught the ball in the right corner of the end zone, just out of reach of cornerback Darrell Green, who hesitated a split second to play the run.

BITS AND PIECES

Gary Brown's 166 yards rushing against the Bengals were the most by an Oiler runner since Earl Campbell had 186 against Seattle in 1981. Brown, subbing for the

**PEACE CORPS
IS OVERSEAS**

**AND, SITTING
RIGHT NEXT
TO YOU IN
CLASS.**

One of your fellow students is a returned Peace Corps Volunteer. Someone who spent two years overseas living and working in a developing country, making real strides in improving the daily lives of the people, while cultivating job skills and career interests.

Now pursuing those interest: in graduate school, this former Volunteer is also helping recruit new Volunteers on your campus. Ask about the most incredible experience of your classmate's life. And, the experience that has enhanced a strong educational and career path. Busy with graduate school, yes. But never too busy to talk about Peace Corps.

Visit your on-campus Peace Corps recruiter. You might have a lot in common.

Peace Corps is an International Development Agency that places Volunteers in work projects overseas. If you have a degree in one of the following fields, consider the Peace Corps: Agriculture, Forestry, Environmental and Recreational Studies, Education, Math & Science, Health & Nutrition and Business Management.

MINORITIES ARE ENCOURAGED TO APPLY

injured Lorenzo White, entered the game with 282 yards rushing in his career.

RAMS' QB BLUES

We don't mean to be rude or premature, but let's face reality: the Los Angeles Rams' post-T.J. Rubley era has arrived, and it is time to move on.

Rubley got his shot a few weeks ago, and it was a performance shaky enough to cause the return Sunday of the quarterback of the past, Jim Everett.

And does anybody—Coach Chuck Knox, those 39,000-plus fans at Anaheim Stadium Sunday, his teammates—really think a beaten, bedraggled, 30-year-old Everett is the man to lead the Rams into the mid-1990s?

Guys they could sign right now:

Todd Marinovich—He's tanned,

rested, and, well, we think he knows how to get to Anaheim Stadium.

Doug Flutie—How many Canadian Football League championships has Everett ever won?

Fugh Millen—Former backup Ram heart throb was beaten out by Jason Garrett in Dallas. He'd probably s't at least they scored points.

Guys they could get at the end of the season:

Chris Miller (Atlanta Falcons)—Will be a free agent at the end of the year, and after blowing out his knee twice on Atlanta's artificial surface, wants to play for a West Coast team that has a grass surface.

Scott Mitchell (Miami Dolphins)—He's a free agent at the end of the year, too.

Dave Krieg (Kansas City Chiefs)—Knox had him for years in Seattle, though we aren't sure if that's a plus or a minus.

GRADE, from page 12

GPA in computer science.

Heyne and Graham were 1992 first-team all-MVC academic selections.

Heyne led the Salukis this season in kills (374), hitting percentage (.328) and service aces (32). Her .328 attack percentage was the second best all-time single season mark.

The top mark (.369) belongs to head coach Sonya Locke.

Stein, who finished her playing career with the Salukis Saturday, was named to the first team on the strength of a 3.50 GPA in psychology.

Stein finished her senior season tops on the team in digs (317) and fifth in kills (229).

Herdas tallied a 3.61 GPA in communications, while placing second on the team in kills (305) and third in digs (268). Her 60 assists were best on the team among non-setters.

Diehl was the fourth SIUC player named to the first team. She posted a 3.14 GPA in interior design, and was second on the team in digs (314) and third in kills (264).

Golebiewski rounded out the Saluki academic choices. She had a 3.19 GPA as an undecided major. Golebiewski was second on the team in assists (326) and had 114 digs and 11 service aces this season.

The team was voted on by the MVC volleyball sports information directors.

According to the MVC, nominees for the team must be starters or important reserves on their teams, and must have at least a 3.0 cumulative GPA.

The student-athletes also must have reached sophomore status, both academically and athletically, and must have completed at least one full academic year.

TIDE, from page 12

secure the win.

SIUC was able to get a glimpse of their first Missouri Valley Conference opponent this fall in their third dual standoff when they went head-to-head with Illinois State.

Not even the Redbird's could stop the Saluki blitz though, as SIUC snuck by rival ISU 90-79.

Five out of the nine events left Saluki athletes atop the podium in this one with Brinn and Humphrey leading the way again.

Brinn displayed even more versatility by winning the 400-meter individual medley while Humphrey grabbed the 1650-meter freestyle and the 50-meter butterfly. Jennifer Eaus snagged the 50-meter backstroke title and Holland continued her dominance of the 1-meter diving competition.

"The girl's swam real well and every time they were challenged, they met it, and surpassed it," Klumper said.

His hard to believe, but SIUC saved their best for last.

The Salukis threw salt in the wounds of the their three previous

victims by capping the invitational off with a win at Sunday's quadrangular meet.

Each team sent their top two swimmers to the blocks in the final contest and SIUC didn't let up.

The Salukis freestyled, breaststroked, dove, backstroked and butterflyed their way to victory once again.

Champions included Humphrey (100-meter butterfly), Brinn (1000 freestyle, 200 individual medley) and Holland (1-meter, 3-meter diving).

Also, Krough captured the 200-freestyle champion, Pobanik won the 200-butterfly and Schmidkofer stole the 200-backstroke title.

To cap off the burgundy and white burrage, Davis, Humphrey, Krough and Schmidkofer won the 400-medley relay.

SIUC finished 55 points ahead of second place Illinois State, with Missouri and Illinois placing third and fourth.

"This last meet was tremendous," Klumper said.

Sports Briefs

INDOOR SOCCER TOURNAMENT registration for the tournament begins Dec. 10 at the Student Recreation Center information desk. All entries are due by Jan. 6, 1994. The tournament dates are Jan. 10-14 from 1-4 p.m. Schedules will be posted Jan. 7 on the bulletin boards outside the administrative offices at the Rec Center. Call Kathy Hollister at 536-5531 for more information. Sponsored by International Student Recreation.

The deadline for Sports Briefs is noon two days before publication. The brief should be typewritten, and must include: time, date, place and sponsor of the event and the name and number of the person submitting the item. Briefs should be delivered or mailed to the Daily Egyptian Sports Desk, Communications Building, Room 1247. A brief will be published once and only as space allows.
